COVER PAGE

MEASURING ATTRIBUTES OF WILDERNESS CHARACTER WILDERNESS CHARACTERISTICS INVENTORY

CDCA223-1/SANDY VALLEY WEST AUGUST 2015

Unit: CDCA223-1/Sandy Valley West

Summary of Analysis*

Area Unique Identifier: CDCA223-1/Sandy Valley West

Summar	y
--------	---

^{*} This form documents information that constitutes an inventory finding on wilderness characteristics. It does not represent a formal land use allocation or a final agency decision subject to administrative remedies under either 43 CFR parts 4 or 1610.5-3.

Unit: CDCA223-1/Sandy Valley West

FORM 1

Documentation of BLM Wilderness Characteristics Inventory Findings from Previous Inventory on Record

1. Is there existing BLM wilderness characteristics inventory information on all or part of this area?

	No (Go to f	Form 2)					_	
7	Ves /If ves	and if more th	an one area is	within the area	a, list the unique	identifiers fo	r those areas.).

a) Inventory Source: California Desert Conservation Area Wilderness Inventory 1979

b) Inventory Area Unique Identifier(s): CDCA223

c) Map Name(s)/Number(s): USGS, California 1:100,000: 35115-E1 Mesquite Lake

d) BLM District(s)/Field Office(s): California Desert District/Needles Field Office

2. BLM Inventory Findings on Record:

Existing inventory information regarding wilderness characteristics (if more than one BLM inventory area is associated with the area, list each area and answer each question individually for each inventory area):

Inventory Source: Needles Field Office Inventory

Area Unique Identifier	Sufficient Size? Yes/No (acres)	Naturainess? Yes/No	Outstanding Solitude? Yes/No	Outstanding Primitive & Unconfined Recreation? Yes/No	Supplemental Values? Yes/No		
CDCA225A-1	N	N	N	N	N		
<u> </u>							

FORM 2
Current Conditions: Presence or Absence of Wilderness Characteristics
Area Unique Identifier: CDCA223-1 Acreage: 1,326
Subunit 223-1 is located at the northeast corner of CDCA223; Subunit 223-1 contains 1,326 acres.
(If the inventory area consists of subunits, list the acreage of each and evaluate each separately).
In completing steps (1)-(5), use additional space as necessary.
(1) Is the area of sufficient size? (If the area meets one of the exceptions to the size criterion, check "Yes" and describe the exception in the space provided below),
Yes No
Note: If "No" is checked the area does not have wilderness characteristics; check "NA" for the remaining questions below.
Description (describe the boundaries of the areawilderness inventory roads, property lines, etc.):
This unit is triangular, the northern boundary is Route NN415, the eastern boundary is Route NN420 and the southwest boundary is the North Mesquite Wilderness Boundary. Public lands in this unit surround the privately owned Section 16, Township 19 North, Range 12 East, San Bernardino Meridian.
(2) Does the area appear to be natural?
Yes No _√_ N/A
Note: If "No" is checked, the area does not have wilderness characteristics; check "NA" for the remaining questions below.
Description (include land ownership, location, topography, vegetation, and summary of major human uses/activities):
The 1,326 acres in this unit are split into three pieces by a section of privately owned land, which is heavily farmed.
(3) Does the area (or the remainder of the area if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) have outstanding opportunities for solitude?
Yes No N/A

Office: Needles Field Office Unit: CDCA223-1/Sandy Valley West

Description (describe the area's outstanding opportunities for solitude):
None
(4) Does the area (or the remainder of the area if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) have outstanding opportunities for primitive and unconfined recreation?
Yes No N/A \forall
Note: If "No" is checked for both 3 and 4 the area does not have wilderness characteristics; check "NA for question 5.
Description (describe the area's outstanding opportunities for primitive and unconfined recreation):
None
(5) Does the area have supplemental values (ecological, geological, or other features of scientific, educational, scenic or historical value)?
Yes No N/A√
Description:

Office: Needles Field Office Unit: CDCA223-1/Sandy Valley West

None

Unit: CDCA223-1/Sandy Valley West

WILDERNESS CHARACTERISTICS INVENTORY

APPENDIX C - ROUTE ANALYSIS¹

(Factors to consider when determining whether a route is a road² for wilderness characteristics inventory purposes.)

Route Analysis Table

Route #	Purpose	Row			Maintenance if needed	WIÜ Road	Photo Points

2							_
3		<u> </u>					

Route Map: See Attached

Wilderness Characteristics Inventory Area Unique Identifier: CDCA225A-1

Route or Route Segment³ Name and/or Identifier: See Table

(Include Transportation Plan Identifier, if known, and include route number supplied by citizen

information, when available.)

I. LOCATION:

Refer attached map CDCA223-1/Sandy Valley West and BLM corporate data (GIS) located at the California State Office. List photo point references (where applicable) and/or reference attached photo log:

Describe:

This unit is triangular, the northern boundary is Route NN415, the eastern boundary is Route NN420 and the southwest boundary is the North Mesquite Wilderness Boundary. The acreage is divided into three parts, which are located on each side of a privately owned agricultural section of land.

This form documents information that constitutes an inventory finding on wilderness characteristics. It does not represent a formal land use allocation or a final agency decision subject to administrative remedies under either 43 CFR parts 4 or 1610.5-3.

² Road: An access route which has been improved and maintained by mechanical means to insure relatively regular and continuous use. A way maintained solely by the passage of vehicles does not constitute a road.

a. Improved and maintained – Actions taken physically by people to keep the road open to vehicle traffic. —Improved does not necessarily mean formal construction. —Maintained does not necessarily mean annual maintenance.

b. Mechanical means - Use of hand or power machinery or tools.

c. Relatively regular and continuous use – Vehicular use that has occurred and will continue to occur on a relatively regular basis. Examples are: access roads for equipment to maintain a stock water tank or other established water sources, access roads to maintained recreation sites or facilities, or access roads to mining claims.

Unit: CDCA223-1/Sandy Valley West

II. ROUTE CONTEXT

A. Current Purpose⁴ (if any) of Route: (Examples: Rangeland/Livestock Improvements (stock tank, developed spring, reservoir, fence, corral), Inholdings (ranch, farmhouse), Mine Site, Concentrated Use Site (camp site), Recreation, Utilities (transmission line, telephone, pipeline), Administrative (project maintenance, communication site, vegetation treatment)).

Describe:

B. Right-of-Way (ROW): 1. Is there a ROW associated with this route(s)?
Yes No <u>\lambda</u>
2. If yes, what is the stated purpose of the ROW?
3. Is the ROW still being used for this purpose?
Yes No_ √ Unknown or N/A
Explain:
III. WILDERNESS INVENTORY ROAD CRITERIA
A. Evidence of construction or improvement using mechanical means:
Yes (if either A.1 or A.2 is checked "yes" below) No $\sqrt{}$ (if both A.1 and A.2 are checked "no" below)
1. Construction: (Is there evidence that the route or route segment was originally constructed using mechanical means?) Yes No $_{-\sqrt{-}}$
Examples: Paved Bladed Graveled Roadside Berms Cut/Fill Other
Describe:

³ If a portion of a route is found to meet the wilderness inventory road criteria (see Part III) and the remainder does not meet these criteria (e.g., a cherrystem road with a primitive route continuing beyond a certain point), identify each segment and explain the rationale for the separate findings under pertinent criteria.

⁴ The purpose of a route is not a deciding factor in determining whether a route is a road for wilderness characteristics inventory purposes. The purpose of a route does provide context for factors on which such a determination may be based, particularly the question of whether maintenance of the route ensures relatively regular and continuous use. The purpose also belps to determine whether maintenance that may so far have been unnecessary to ensure such use would be approved by BLM when the need arises.

Unit: CDCA223-1/Sandy Valley West
2. Improvements: (Is there evidence of improvements using mechanical means to facilitate access?) YesNo√_ If "yes": by Hand Tools by Machine
Examples: Culverts Hardened Stream Crossings Bridges Drainage Barriers Other
Describe:
B. Maintenance: (Is there evidence of maintenance that would ensure <i>relatively</i> regular and continuous use?): Yes (if either B.1 or B.2 is checked "yes" below) No _√_ (if both B.1 and B.2 are checked "no" below)
1. Is there Evidence or Documentation of Maintenance using hand tools or machinery?
Yes No If "yes": by Hand Tools by Machine
Explain:
2. If the route or route segment is in good ⁵ condition, but there is no evidence of maintenance, would mechanical maintenance with hand tools or machines be approved by BLM to meet the purpose(s) of the route in the event this route became impassable?
Yes No
Explain:
⁵ Good condition would be a condition that ensures regular and continuous use relative to the purposes of the route. Consider whether the route can be clearly followed in the field over its entire course and whether all or any portion of the route contains any impediments to travel.
C. Relatively regular and continuous use: (Does the route or route segment ensure relatively regular and continuous use?) Yes $No \sqrt{}$
Describe evidence (e.g., direct, vehicles or vehicle tracks observed, or indirect, evidence of use associated with purpose of the route such as maintenance of facility that route accesses) and other rationale for whether use has occurred and will continue to occur on a <i>relatively</i> regular basis (i.e., regular and continuous use relative to the purpose(s) of the route).
Describe:
IV. CONCLUSION:
Does the route or route segment ⁷ meet the definition of a wilderness inventory road (i.e., are items III.A and III.B and III.C all checked yes)?
Yes = Wilderness Inventory Road No _√ _ = Not a road for wilderness inventory purposes
Page 8

Unit: CDCA223-1/Sandy Valley West

Explanation⁸:

Evaluator(s):

Date: 10/1/2015

⁶ Include estimate of travel rates for the stated purposes, e.g., trips/day or week or month or season or year or even multiple years in some facility maintenance cases.

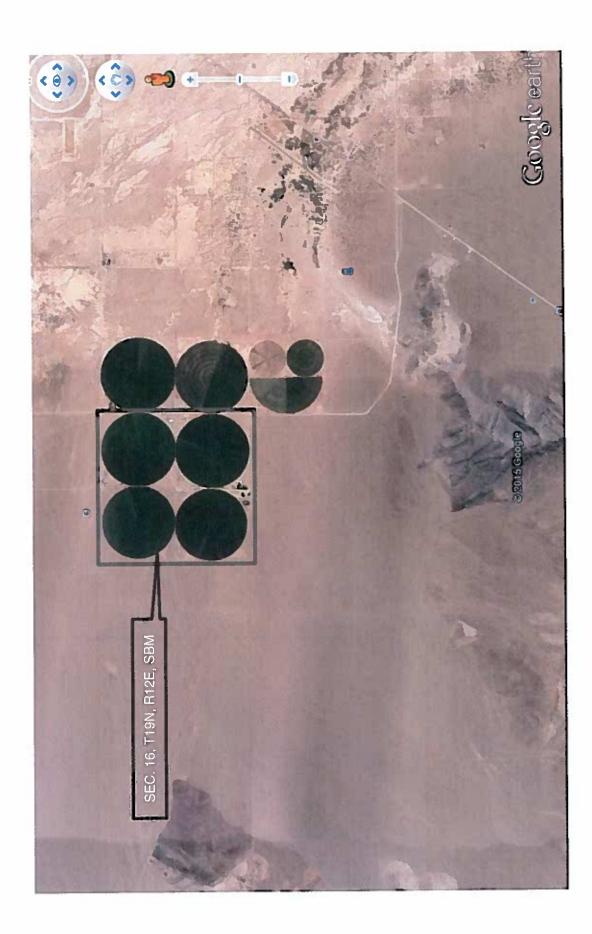

⁷ If part of the route meets the wilderness inventory road definition and the remainder does not, describe the segment meeting the definition and any remaining portion not meeting the definition and why.

⁸ Describe and explain rationale for any discrepancies with citizen proposals.
